**BRIEF NOTE ON IMPLEMENTATION OF SCHEMES IN MADA/CLUSTER VILLAGES MODIFIED AREA
DEVELOPMENT APPROACH (MADA) AND CLUSTERS:-**

I. INTRODUCTION:-

Government of India policy and the objectives of State Government the Tribals have been divided into four categories to promote expedition Socio-Economic Development.

1. Tribals in Sub-Plan area Areas of Tribal concentrations & Agency.
2. Tribals in Special pockets of Tribal Concentrations in plain areas – MADA.
3. Primitive Tribal Groups (PTGs) who are still at Pre-Agricultural economic subsistence level.
4. Dispersed Tribal Groups (DTG) in plain areas.

Modified Area Development Approach (M.A.D.A.) Tribal was introduced in October, 1980 to develop the economic conditions of the Tribals living in Geographically isolated, contiguous and compact area in the District. This would envisage introduction of development process through proper selection of resources and need based package of schemes suitable to the socio economic conditions of the Area Scheduled Tribals. The strategy would necessarily involve a collective effort mobilization and cohesive integration of MADA agency and financing institutions like "TRICOR".

The MADA Office established in 8th October, 1991 at Mahadevpur for speedy implementation of MADA Cluster programmes in (3) Mandals i.e., Mahadevpur, Kataram and Mahamutharam (As per the G.O. Ms. No. 196 Social Welfare (D) Department, dated: 30-09-1991).

The following Sub-Tribes identified as aboriginal Tribals in Karimnagar Dist.

1. Naikpod
2. Thoti (PTG)
3. Koya
4. Gond

As per SC & ST orders (Amendment) Act, 1976, the Yerukalas, Yanadi and Lambada living in Telangana Region became STs. This change necessitated extending developmental activities on large scale to tribals living in plain area.

Three criteria have been laid down for identification of the tribal pockets under Modified Area Development Approach. (MADA).

1. A minimum population of 10,000.
2. 50% of the population in the pockets should belong to scheduled tribes.
3. The villages in the pockets should be contiguous.

In accordance with the above guidelines 41 MADA pockets were identified and sanctioned in

the combined state. The working group on development of STs during seventh five year plan (1985-90) suggested relaxation of present norm of total not less than 10000 population of which not less than 50% is scheduled tribes to 5000 total population of which not less than 50% STs. Accordingly 17 clusters having a total population of at least 5000 and above with a scheduled tribe concentration of 50% or more were identified in the state.

One (1) MADA pocket and one (1) cluster pocket were identified and sanctioned in Karimnagar district.
